

ADDO MICHAEL OBIRI

Junior Software Engineer | Full-Stack & Mobile Developer

Accra, Ghana | 054 885 2176 | michaelobiri022@gmail.com
GitHub: github.com/obirimike | LinkedIn: linkedin.com/in/michael-addo-k23 | Portfolio: michaeladdo.netlify.app

PROFESSIONAL SUMMARY

Computer Science student at the University of Ghana with hands-on experience building full-stack web and mobile applications across professional, academic, and independent projects. Skilled in React, React Native, TypeScript, Node.js, Express.js, REST API design, PostgreSQL, MongoDB, and Git-based collaborative workflows, with additional grounding in network administration and IT support. Currently a Full-Stack Developer at OptiTech Solutions, building production-stage mobile software within a 7-member engineering team.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Java, Python, HTML, CSS
- Frontend & Mobile:** React, React Native, Vite, Expo, Expo Router, Tailwind CSS
- Backend & APIs:** Node.js, Express.js, ASP.NET Core, REST APIs, JWT Authentication
- Databases:** PostgreSQL, MongoDB, Supabase, SQLite
- Tools & Platforms:** Git, GitHub, Docker, Postman, VS Code, Prisma, EAS Build
- Systems:** Linux/Ubuntu, Microsoft Office (Excel, Word, PowerPoint)
- Other:** API Integration, Authentication, Payment Gateway Integration, Responsive UI Development

PROFESSIONAL EXPERIENCE

Full-Stack Developer — OptiTech Solutions 2025 – Present | Accra, Ghana
OptiTech Solutions

- Collaborate within a 7-member development team to build and prepare a mobile application (BelDepot) for production.
- Built 6 React Native screens with Expo and Expo Router in TypeScript, shaping the app's core mobile UX.
- Designed and shipped 8 REST APIs powering authentication, bookings, and payments.
- Delivered 4 major end-to-end features spanning frontend and backend.
- Contributed to authentication workflows and payment gateway integration.
- Identified and resolved 15+ bugs across development and testing cycles, improving release stability.
- Used Git/GitHub for version control and collaborative, team-based development.

Tech: React Native, Expo, Expo Router, TypeScript, Django, PostgreSQL, EAS Build, Git

Junior Network & IT Support Intern Oct 2025 – Nov 2025 | Accra, Ghana
Ghana Free Zones Authority

- Provided first-level technical support for hardware, software, and network issues.
- Diagnosed and resolved network connectivity problems, restoring user access to shared resources.
- Configured workstations and supported staff through common technical setup issues.
- Assisted with maintenance and troubleshooting of network equipment and day-to-day IT requests.

Volunteer IT Support 2025 | Accra, Ghana
L.A. St. Paul's JHS

- Provided voluntary technical support for computer and technology-related issues.
- Assisted school staff with troubleshooting and day-to-day technology usage.
- Contributed to the school's digital transformation by developing its online platform.

SELECTED PROJECTS

BelDepot App — Flagship product built at OptiTech Solutions 2025 – Present
Full-Stack / Mobile Developer

- Production mobile app for BelDepot; full experience detailed under Professional Experience above.

Tech: React Native, Expo, TypeScript, Django, PostgreSQL, Git

UGMart Campus Market 2026 | Near completion
Independent Project

- Built a campus marketplace SPA where students discover and interact with products and services.
- Developed a responsive, component-based frontend with React and Vite.
- Built backend services and REST APIs with Express.js, backed by MongoDB.
- Managed version control and prepared the application for deployment via Git/GitHub.

Tech: React, Vite, Express.js, MongoDB, REST APIs

L.A. St. Paul's JHS Website

2025 | Live

Web Developer

- Designed and built a live school website serving students, parents, and administration.
- Implemented online admissions and fee-payment workflows.
- Enabled students to access and download academic results and school documents.

Tech: Vite, HTML, JavaScript, Tailwind CSS

Cafeteria Menu Advisor — Expert System

2026

Frontend Developer, Team Project

- Built the frontend for an expert system recommending meals based on student preferences.
- Integrated the UI with a Flask backend and a Prolog-based knowledge/inference engine.
- Translated rule-based recommendation logic into an accessible, user-friendly interface.

Tech: React, Vite, Python, Flask, Prolog

OptiTech Solutions Website

2026 – Present | In development

Frontend Developer

- Building the website for OptiTech Solutions, a startup founded with university colleagues.
- Implemented responsive styling with Tailwind CSS and interactive motion with Framer Motion.
- Structured the codebase to support future collaboration as the team grows.

Tech: React, TypeScript, Tailwind CSS, Framer Motion, SQLite

OnPoint Website

2025

Web Developer

- Independently designed and built a responsive website for OnPoint, start to finish.
- Implemented responsive layouts and interactive frontend functionality.

Tech: Vite, HTML, CSS, JavaScript

Personal Portfolio

2026 | michaeladdo.netlify.app

Developer

- Designed and built a responsive portfolio showcasing projects, skills, and experience.
- Built reusable, typed React components and deployed the site for public access.

Tech: React, TypeScript, CSS

EDUCATION

BSc Computer Science

Sep 2024 – Present (Expected 2027)

University of Ghana

ACHIEVEMENTS & PROFESSIONAL DEVELOPMENT

VibeCoding Hackathon — 2026

- Built and deployed a student timetable generator to help students plan and manage academic schedules.

Cisco Networking Training — In Progress

- Strengthening networking, infrastructure, and IT support capabilities.
